

**AnaSpec**

Antibodies, peptides, labeling kits, proteins

**Cell Signaling Technology**

Antibodies signal transduction, cytokines, kinases, ELISA/arrays/assays

**Cayman Chemical**

Assay kits, antibodies and biochemicals

**Eurogentec**

Custom services antibodies, peptides and oligos, PCR and qPCR

**GREINER Bio-One**

Microplates 96, 384 and 1536, TC plastics, centrifuge tubes etc

**GenScript**

Products and services for life science research including custom gene and peptide synthesis

**MP Biomedicals**

Instrumentation and kits for DNA/RNA extraction

**Lonza**

Primary & adult stem cells, pluripotent stem cells, cell culture products, transfection, electrophoresis

**ORIGENE Technologies**

Human cDNA full length clones – transfection ready, recombinant proteins, cell extract and antibodies

**NEW ENGLAND Biolabs**

Restriction and modifying enzymes, protein tools, next generation sequencing PCR, cellular imaging

**Diagenode**

Solutions for Epigenetics research including sonication based shearing devices, reagent kits and antibodies.

**ROCKLAND Immunochemicals**

Primary and secondary antibodies

**Thermo Scientific/NanoDrop**

Nanodrop instruments measuring nucleic acid concentrations from small sample volumes

**Vector labs**

Detection kits for immunohistochemistry and immunofluorescence

**Sage Science**

Fractioning for Next Generation Sequencing

**Worthington**

Enzymes for tissue dissociation – collagenase etc
